**FormFactor Seeks Relief from the US International Trade Commission  
for Infringement of Six US Patents**

*Company asks ITC to institute an investigation against MJC and Phicom extending beyond the patent infringement allegations of the ongoing federal court actions*

LIVERMORE, Calif. – November 14, 2007 – FormFactor, Inc. (Nasdaq: FORM), an industry leader in the design, development and manufacture of semiconductor wafer probe cards, announced the filing of a complaint with the United States International Trade Commission (“ITC”) seeking institution of a formal investigation by the United States government into the activities of Micronics Japan Company, Ltd., MJC, a Japanese corporation and Phicom Corporation, a Korean corporation. In the ITC complaint, FormFactor requests a permanent exclusion order banning importation of infringing products into the United States.

“This latest filing supports FormFactor’s long-term commitment to deliver mission critical products that reduce our customers’ overall cost of test,” said Igor Khandros, CEO of FormFactor. “The protection of intellectual property rights provides an important incentive for innovation and enables our continuing investment in research and development. The ITC investigation is a part of our comprehensive strategy to protect our IP on a global basis.”

FormFactor has previously filed patent infringement actions in US federal courts against MJC and Phicom. The requested investigation encompasses US Patent Nos. 5,994,152, 6,509,751, 6,615,485, 6,624,648, 7,168,162 and 7,225,538, and overlaps with each of the previously filed federal court complaints, but also asserts additional US patents against both MJC and Phicom. The company is also asserting certain of its Korean patents against Phicom in patent infringement proceedings in Korea.

**Forward-Looking Statements**

Statements in this press release that are not strictly historical in nature are forward-looking statements within the meaning of the federal securities laws, including statements regarding our business, products and solutions, product development and future growth. These forward-looking statements are based on current information and expectations that are inherently subject to change and involve a number of risks and uncertainties. Actual events or results might differ materially from those in any forward-looking statement due to various factors, including, but not limited to: the demand for certain semiconductor devices; whether the US International Trade Commission institutes an investigation and the scope and nature of any investigation; the company's ability to defend its intellectual property rights before the US International Trade Commission, before federal courts in the US, before courts in Korea and elsewhere in the world, the company's ability to develop customized solutions that meet its customers' ever-evolving test requirements, and the company's continuing ability to innovate and develop and deliver the next generation of testing technology to help enable semiconductor manufacturers to lower their test costs. Additional information concerning factors that could cause actual events or results to differ materially and adversely from those in any forward-looking statement is contained in the company's filings with the Securities and Exchange Commission, including the company's Form 10-K/A for the fiscal period ended December 30, 2006, Form 10-Q for the quarterly period ended September 29, 2007 and subsequent SEC filings. Copies of the company's SEC filings are available at <http://investors.formfactor.com/edgar.cfm>. The company assumes no obligation to update the information in this press release, to revise any forward-looking statements or to update the reasons actual results could differ materially and adversely from those anticipated in forward-looking statements.

**About FormFactor**

Founded in 1993, FormFactor, Inc. (Nasdaq: FORM) is the leader in advanced wafer probe cards, which are used by semiconductor manufacturers to electrically test ICs. The company's wafer sort, burn-in and device performance testing products move IC testing upstream from post-packaging to the wafer level, enabling semiconductor manufacturers to lower their overall production costs, improve yields, and bring next-generation devices to market. FormFactor is headquartered in Livermore, California with operations in Europe, Asia and North America. For more information, visit the company's web site at [www.formfactor.com](http://www.formfactor.com).
